Disclaimer

GS1®, under its IP Policy, seeks to avoid uncertainty regarding intellectual property claims by requiring the participants in the Work Group that developed this GS1 Document Name GS1 Document Type to agree to grant to GS1 members a royalty-free licence or a RAND licence to Necessary Claims, as that term is defined in the GS1 IP Policy. Furthermore, attention is drawn to the possibility that an implementation of one or more features of this Specification may be the subject of a patent or other intellectual property right that does not involve a Necessary Claim. Any such patent or other intellectual property right is not subject to the licensing obligations of GS1. Moreover, the agreement to grant licences provided under the GS1 IP Policy does not include IP rights and any claims of third parties who were not participants in the Work Group.

Accordingly, GS1 recommends that any organisation developing an implementation designed to be in conformance with this Specification should determine whether there are any patents that may encompass a specific implementation that the organisation is developing in compliance with the Specification and whether a licence under a patent or other intellectual property right is needed. Such a determination of a need for licensing should be made in view of the details of the specific system designed by the organisation in consultation with their own patent counsel.

GS1 Germany GmbH

It started with a simple beep.

In 1974, a barcode was scanned for the first time in a supermarket. This was the beginning of automated checkout - and the start of GS1's success story. The machine-readable GS1 barcode with the included GTIN is now the universal standard in the global exchange of goods and is scanned six billion times a day on products. GS1 standards are the global language for efficient and secure business processes that are valid across company boundaries and continents. As part of a global network, we work with our customers and partners to develop market-driven and future-oriented solutions that directly contribute to their business success. Today, two million companies from over 20 industries worldwide use this language to uniquely identify products, locations and assets, to record relevant data and to share it with business partners in the value creation networks. GS1 - The Global Language of Business.

1 Introduction

The documentation of the GS1 Germany GDSN Target Market Profile FMCG is revised and published every year in four update cycles.

Section 1.1 Release Planning presents a detailed overview of the release plan for the current year.

Both release dates for the GS1 Business Message Standard (BMS) and corresponding dates regarding the target market requirements for the German FMCG target market profile are listed.

The BMS GoLive date serves as a guideline and orientation point for planning the release dates within the framework of the GS1 Germany GDSN target market profile FMCG in the coming periods.

The documentations affected by the changes are listed in section 1.2 Documentation.

1.1 Release Planning

Note on the February 2025 release (BMS 3.1.30):
There will be no GDSN release for BMS 3.1.30 in February 2024. Target market requirements planned after the November 2024 release will therefore be implemented with the May 2025 release.

With the February 2025 release, CCDQ is planning the DQ version 2.30 as a service release. Only changes to reference tables based on changes in the German target market profile and changes in external databases as well as reactivations are planned.

3.4 Migration

3.4.1 Recyclingcodes

Please note the migration of various old recycling codes from the code list 'LocalPackagingMarkedLabelAccreditationCode' to the attributes 'packagingMarkedLabelAccreditationCode' and 'packagingRecyclingSchemeCode'.

The migration document is included in the release documents.

3.4.2 Adjustment to the new attribute consumerUsageLabelCode

At the European level, it has been agreed to use the code list "ConsumerInstructions". Therefore, code values from the code list "LocalPackagingMarkedLabelAccreditationCode" are scheduled for deletion, and the new attribute "Verwendungshinweise-Label für den Konsumenten: Code [M180]" is being introduced.
The affected codes include the AISE codes and the "ZWANGERSCHAPSLOGO" from the "LocalPackagingMarkedLabelAccreditationCode" code list. Additionally, the pregnancy logo "PREGNANCY_WARNING" from the "PackagingMarkedLabelAccreditationCode" code list will no longer be used and will be replaced by the new attribute.
With the May release, a migration of the AISE codes and the "ZWANGERSCHAPSLOGO" from the LocalPackagingMarkedLabelAccreditationCode, as well as the code "PREGNANCY_WARNING" from the PackagingMarkedLabelAccreditationCode code list, to the new attribute "Verwendungshinweise-Label für den Konsumenten: Code [M180]" will take place.

Affected changes:
- Attributes: Target market requirements 04 & 05 in Chapter 3.1 Attributes
- Code lists: Target market requirements 02 – 05 in Chapter 3.2 Code lists

3.5 GPC Version

In this illustration, the GPC version is shown alongside the GDSN release version to which it applies.
The GPC classifies products by dividing them into categories based on their essential properties and their relationship to other products.
